INTRODUCTION TO ELDRITCH FOUNDRY

At Eldritch Foundry, we bring fantasy characters to life with custom miniatures, blending expert craftsmanship with a passion for the fantastical. Our mission is to bring players' unique fantasy characters to life with meticulous detail and quality. Blending advanced digital sculpting with a passion for gaming, we offer an array of customizable miniatures, from heroic figures to mystical beings. As we embrace the latest technology and expand our creative frontiers, we invite you to join our journey—a journey where each miniature isn't just a model, but a gateway to countless adventures.

RETROSPECTIVE ON THE PAST YEAR

Reflecting on the past year at Eldritch Foundry, we celebrate a series of groundbreaking achievements and innovations. Each step has strengthened our commitment to enriching the tabletop gaming experience from unveiling new character options to advancing our technology. This retrospective highlights these pivotal developments, underscoring our dedication to creativity and inclusivity in gaming.

LAUNCHED: EPIC POSES AND MOUNTS

Heroic Poses: This year, we've introduced 'Dwarven Statue', 'Sunken Ship', 'Slain Dragon', and 'Broken Column' poses, each meticulously designed to bring characters' triumphs and adventures to life. From the steadfastness of the 'Dwarven Statue' to the victorious narrative of the 'Slain Dragon', these poses have offered players new, exciting ways to depict their characters' heroic stories.

Throne Concepts

Wheelchairs: Our commitment to inclusivity was further reinforced this year with the introduction of diverse wheelchair options in our range. The 'Modern Chariot', 'Corpsebreaker', 'Crawler', 'Warstrider', and 'Elder King' wheelchairs each offer unique designs that challenge traditional fantasy norms and provide players with meaningful ways to represent characters with varied mobility experiences. This initiative reflects our dedication to embracing and celebrating diversity in the realm of fantasy gaming.

Thrones: This year at Eldritch Foundry, we enhanced the narrative depth of our miniatures with the introduction of various throne options. These thrones are designed to suit a range of aesthetics, allowing players to depict characters of high status, power, or regal bearing. Whether it's a classic royal throne, a commanding warlord's chair, or something in between, each design adds a touch of majesty and enriches the storytelling possibilities in our customizable miniature collection.

LAUNCHED: MULTIPLE NEW LINEAGES

Monstrous Lineages: In a significant expansion of our character options this year, Eldritch Foundry introduced a new set of lineages. Each lineage brings an entirely new flavor to the model, enabling players to create characters that stand out distinctly from standard humanoids. From the elemental essence of Earth, Water, Fire, and Air to the mysterious allure of the Revenant, these new lineages have greatly enriched the diversity and creativity within the gaming world, offering players more unique ways to bring their fantasy characters to life.

Alien Ancestry: This year brought with it our first alien lineage, in our continued exploration of science fiction themes. This addition brought unique extraterrestrial features to our lineup, perfect for players crafting campaigns that venture into cosmic realms beyond traditional fantasy. These distinctive, otherworldly characteristics enable the creation of exceptionally imaginative characters, further enriching the diverse storytelling possibilities in our miniature collection.

Mermaid Concept

Alien Ancestry

Mermaid Ancestry: This year, Eldritch Foundry delighted players with the introduction of the Mermaid ancestry, expanding the realm of character creation into the enchanting world of aquatic environments. These new options feature distinct mermaid tails and a variety of related aquatic traits, allowing for the crafting of characters that embody the mystique and allure of the ocean's depths. This addition broadens the scope of our character lineups and brings a fresh, imaginative twist to player storytelling.

Naga Ancestry: The introduction of the naga ancestry this year has offered a striking blend of humanoid torsos with serpentine lower bodies. This unique combination of elegance and power has been a notable addition, providing players with new dimensions of creativity for their storytelling. Ideal for diverse narratives, the Naga enriches our collection with its distinct aesthetic and character possibilities.

EXPANDED OUR REACH

Amputee Options

This year, a significant step was made towards embracing diversity in all its forms with the introduction of various amputee options. These new choices include a range of limb differences, allowing players to create characters that reflect their own experiences or delve into new narratives within their gaming worlds. This addition is a testament to our commitment to inclusivity and representation in fantasy gaming, providing players with the tools to craft more personalized and meaningful characters.

ADVANCED OUR TECHNOLOGY

Tech Updates

Gizmo Posing: This year saw the introduction of our innovative gizmo posing feature at Eldritch Foundry. This tool has empowered users with unprecedented control over the positioning of their characters, enabling the fine-tuning and manipulation of poses with remarkable precision. This advancement has opened up new possibilities for detailed and specific character customization, enhancing the overall experience of bringing fantasy characters to life.

VTT Exporter: In response to the increasing popularity of digital tabletop gaming, this year Eldritch Foundry unveiled a pivotal innovation: a Virtual Tabletop (VTT) exporter. This tool seamlessly integrates our custom miniatures into various virtual gaming platforms, significantly enhancing the online gaming experience. It represents a bridge between the physical and digital realms of gaming, allowing players to use their personalized miniatures in both settings, bringing greater versatility and enjoyment to their gaming adventures.

Render Engine: A key achievement for Eldritch Foundry this year was the significant upgrade of our render engine, with a special focus on enhancing lighting effects. This upgrade has brought our engine's capabilities beyond the level of some professional rendering software, particularly in how light interacts with the miniatures. The result is a dramatic improvement in visual realism, offering more lifelike miniatures that showcase intricate details in a more vivid and dynamic way. This advancement in lighting technology elevates the entire visual experience of our characters, setting a new industry benchmark in miniature rendering.

PLANS FOR THE COMING YEAR

As we step into 2024, Eldritch Foundry is excited to unveil an array of new and innovative additions to our fantasy gaming world. From enchanting familiars and powerful heavy weapons to an expansive array of new ancestries and magical effects, our upcoming offerings are designed to enhance and diversify your gaming experience. Join us as we embark on this journey of creativity and expansion, continually pushing the boundaries of imagination in the realm of tabletop gaming.

Introducing

Familiars Pack: Adding a whimsical touch, our new range of familiars like frogs, owls, crows, parrots, chickens, and foxes will offer players more ways to personalize their gaming experience.

Heavy Weapons with Dual Grips: Elevating combat realism, these new heavy weapons will feature dual grips and offer three unique designs each, enhancing the tactical aspects of gameplay.

Hair/Beard Packs: Responding to player demand, we're introducing diverse hair and beard styles, allowing for more detailed character customization.

Mounts Collection: Our new mounts, including Rams, Pigs, and Dead Horses, will provide characters with diverse travel companions, each bringing its own unique flair to the game.

Mayan Pack: Delving into cultural diversity, the Mayan pack will feature historically inspired weapons, armor sets, and shields, offering new thematic possibilities.

Wings and Magic Effects: We're adding wings and various magic effects for a touch of fantasy, perfect for characters with mystical or supernatural elements.

New Bases Pack: A new selection of bases will be available, giving players more options to showcase their miniatures in diverse environments.

Expansion

New Ancestries: We're broadening our horizons with new ancestries like lions, centaurs, minotaurs, werewolves, pigs, sharks, wolves, featureless heads, mice, turtles, and elephants, each designed to bring a unique set of traits and storytelling potential.

Enhancing our technology

Asset Updates: We plan to update, fix, and replace a significant portion of our medieval armor sets and weapons, ensuring they meet our high standards of quality and detail.

Heroic Assets Integration: Heroic assets will be made available for every pose, offering players more dramatic and dynamic options for their characters.
